

Create PDF files quickly and easily!

The pdf995 suite of products - Pdf995, PdfEdit995, and Signature995 - is a complete solution for your document publishing needs. It provides ease of use, flexibility in format, and industry-standard security- and all at no cost to you.

Pdf995 makes it easy and affordable to create professional-quality documents in the popular PDF file format. Its easy-to-use interface helps you to create PDF files by simply selecting the "print" command from any application, creating documents which can be viewed on any computer with a PDF viewer. Pdf995 supports network file saving, fast user switching on XP, Citrix/Terminal Server, custom page sizes and large format printing. Pdf995 is a printer driver that works with any Postscript to PDF converter. The pdf995 printer driver and a free Converter are available for easy download.

PdfEdit995 offers a wealth of additional functionality, such as: combining documents into a single PDF; automatic link insertion; hierarchical bookmark insertion; PDF conversion to HTML or DOC (text only); integration with Word toolbar with automatic table of contents and link generation; autoattach to email; stationery and stamping.

Signature995 offers state-of-the-art security and encryption to protect your documents and add digital signatures.

The Pdf995 Suite offers the following features, all at no cost:

Automatic insertion of embedded links

Hierarchical Bookmarks

Support for Digital Signatures

Support for Triple DES encryption

Append and Delete PDF Pages

Batch Print from Microsoft Office

Asian and Cyrillic fonts

Integration with Microsoft Word toolbar

This document illustrates several features of the Pdf995 Suite of Products.

Shortly after the Geneva BOF session, the www-vr 1 ailing list was created to discuss the develop ent of a specification for the first version of VRML. The response to the list invitation was overwhel ing: within a week, there were over a thousand e ers. After an initial settling-in period, list oderator Mark Pesce of La yrinth Group announced his intention to have a draft version of the specification ready y the Fall 99 conference, a ere five onths away. There was general agree ent on the list that, while this schedule was aggressive, it was achieva le provided that the require ents for the first version were not too a itious and that VRML could e adapted fro an existing solution. The list quickly agreed upon a set of require ents for the first version, and egan a search for technologies which could e adapted to fit the needs of VRML.

The search for existing technologies turned up a several worthwhile candidates. After uch deli eration the list ca e to a consensus: the Open Inventor ASCII File For at fro Silicon Graphics, Inc. The Inventor File For at supports co plete descriptions of 3D scenes with polygonally rendered o jects, lighting, aterials, a ient properties and realis effects. A su set of the Inventor File For at, with extensions to support networking, for s the asis of VRML. Gavin Bell of Silicon Graphics has adapted the Inventor File For at for VRML, with design input fro the ailing list. SGI has pullicly stated that the file for at is available for use in the open arket, and have contributed a file for at parser into the pullic do ain to ootstrap VRML viewer develop ent.
